

ZT-1000R Insulation Resistance Meter User Manual

Model: EC-ZOYI-1000R | Brand: FeelTech

1. Product Overview

The FeelTech ZT-1000R is a high-precision digital megohmmeter and multimeter designed for measuring insulation resistance, voltage, resistance, capacitance, diode, temperature, and continuity. It features advanced functions such as Dielectric Absorption Ratio (DAR) and Polarization Index (PI) testing, making it an essential tool for electrical maintenance and troubleshooting.

This device combines the capabilities of an insulation tester and a multimeter, offering versatility and accuracy for various industrial and scientific applications. Its robust design includes a durable rubber case for enhanced protection against dust, drops, and insulation.

2. Package Contents

Verify that all items listed below are present in your package:

- ZT-1000R Insulation Multimeter
- Test Leads (Red and Black)
- Alligator Clips (Red and Black)
- Rechargeable Batteries (3x)
- Battery Charger
- Soft Carrying Pouch
- User Manual (this document)
