

UT262E is a clamp-type non-contact phase detector. it can avoid electric sparks due to contact with bare wires, reducing the risk of electrical shock to electricians and other professional personnel. UT262E can also be used for live wire detection, simple electrical inspection, phase identification, missing-phase judgment, wire breaker searching, and positive or negative states through audio and visual indication. It is a perfect tool for phase sequence detection, motor mounting, and wires maintenance. It improves the safety of field testing, ensures the safety of operators, increases productivity.

Models	UT262E				
Function/Application	Phase detection, live wire examination, power inspection, phase loss judg breakpoints finding, breakpoints positioning.				
Measurement method	Non-contact detection				
AC voltage (V)	70~1000VAC (Three phase)				
Frequency (Hz)	45Hz~66Hz				
Operating temperature	0°C~50°C				
Storage temperature	-20°C~60°C				
Operating humidity	<85% (Non condensing)				
Button life	10000 cycles				
Insulation intensity	3.7kVrms				
Buzzer level	65~70dB				
IP rating	IP52				
Category rating	CAT III 1000V, CAT IV 600V				

Test status	LED indication status							Buzzer
